The System

Nofence is the world's first virtual fencing system for livestock, combining GPS collars with an app to make grazing management simple. Learn how it works and explore what it can deliver for your herd.

1

IoT Cellular & GPS

No base station required.

2

HerdNet™

Collar-to-collar communication for instantaneous updates.

3

100% App-Driven

Use the Nofence app to draw and adjust grazing boundaries directly on Google Maps and monitor animal movement.
